

# NO RESIDUE VOID LABEL

No residue void labels are the best solution to control the access of the aircrafts doors, once they are parked or in storage.

Moreover, these labels may also be used for:

Cupboard trolleys

Inspection panels

Hatchways

Duty-free packages

Boxes and luggage

Life jackets

No residue void labels are specifically designed for not leaving any sticky residue on the surface to which they are applied to.

However, once someone tries to remove them, the labels will reveal a message “VOID” that means they have been tampered with and cannot be applied once again. This avoids further checks, saving both time and money.

Moreover, these labels have a double numbering that can be kept into the register.

Control stages are speeded up and any mistake due to a writing down step is avoided.

Customers will take advantage of this product since it:

- a) Reduces costs for assets monitoring.
- b) Protects against any unauthorised access.
- c) Discourages anyone that tries to steal or tamper it with.

#### Additional information

No residue void security labels are a simple and effective sealing method used by airport operators, airlines and all those companies working in the transport field.

There are several points that need to be protected against any attempts at tampering.

Guarantee issue often plays a significant role in these fields.

LeghornGroup no residue void labels provide a proof for any attempts at tampering and our users are protected against third parties.

The picture shows how the void label has been irremediably tampered with, even if it is positioned once again.

The VOID writings are visible on the surface of the label that has been removed and provides a clear message that someone has tampered it with.

No residue void label are particularly suitable for each outside access panel of an aircraft since control steps will be faster and safer.

LeghornGroup has a great deal of experience in the production of security labels, both with residue and not, especially those designed for aircraft application.

LeghornGroup provides the most suitable solutions for each application.

Void labels are adhesive security labels and they are also applied on products under warranty, goods in rental, in assistance or undergoing repair, in order to point out attempts to open products, hardware, goods or packaging by unauthorised people.

Void security labels are also an efficient way to control and monitor the originality of the product along its entire route from its production until the purchase by the final customer.

Art:	Art: NRLS RED 85x25 "NO RESIDUE LABEL SEAL"
Color	Light blue – Green – White –Yellow - Red
Size	85x25 mm ( 3" 3/8" x 1") 110x30mm ((4-1/16"x 1'-3/16"))
