Plastic security seals. General index.

Plastic seals

LeghornGroup, the European leading company in the production of plastic seals, shows in its catalogue mechanical and technical high quality characteristics of its security seals.

All our plastic seals may be customised and numbered with the utmost quality printings.

Plastic seals are a lock system used to improve the package security or as fixing system for closings, doors and other objects that might be opened.

There are several types of plastic seals of different closing and opening mechanisms, according to their application.

LeghorGroup manufactures totally plastic seals and plastic seals with metal high security closure.

With more than 40 years of experience, we are a reference point in the seals, security and guarantee products field.
