## **VOID TAMPER EVIDENT LABEL**

**PROTECTION - CONTROL - IDENTIFICATION - TRACKING**

**THEFT PREVENTION AND POSSIBLE LAPTOP RECOVERY**

By using a void label thieves will have some problems to resell a laptop.  
In the event of loss, there is a good chance of recovering the laptop.

VOID labels of LeghornGroup are highly visible and once someone tries to remove them, they will give evidence of any attempt of removal.

Void labels may also have a progressive numbering which contributes to prevent thefts and the reselling of objects to which they have been applied to.

LeghornGroup has more than 20 years of experience in security VOID labels.

These labels contribute to the identification of different objects such as laptops and printers.

Labels can be supplied in rolls with progressive numbering, in different shapes, sizes and colours.

Moreover, VOID security labels of LeghornGroup allow to keep track of the different assets of a company.

Void labels also ensure the authenticity of a product. If the label is intact, any attempt of tampering has occurred.
