Arachneseal. Seals for tags

Description:

This type of seal for tags is designed to close and hold light weights. They are used for economic and short-term solutions. They are easily removable because their tensile strength is less than 6 kg. This PP (polypropylene) seal is very suitable for affixing maintenance tags for fire extinguishers and in all those cases where it is necessary to give information about a product.

 80x2,5   mm
  100x2,5 mm
  120x2,5 mm
  150x3,6 mm
  200x3,6 mm

(ask for general catalogue)

Frissoseal. Seal with numbering for emergency doors

LeghornGroup seals for emergency doors are all numbered and customizable.
They have an appropriate TENSILE STRENGTH, so that they can be easily broken if necessary.
As for the FRISSOSEAL model for emergency doors, this model has a tensile strength of less than 80N as required by current regulations. Upon request we can provide the certificate of tensile strength issued by Pisa University.

Ultra destructible security labels.

LeghornGroup has been an expert in tamper evident systems for 45 years.

In the field of security labels, ultra-destructible labels play an important role and will completely flake off in the event of a removal attempt.

We are also able to produce labels with very small dimensions: even a few millimeters of side or diameter.

RFID: traceability check.

LeghornGroup s.r.l. supplies small and sturdy **RFID UHF** TAG designed to stick to curved metal surfaces.

This "metal tag" allows you to manage all the information relevant to the single fire extinguisher with the possibility to update this information whenever necessary.

Alert lock: electronic closure.

In case of UNAUTHORIZED access to large fire-fighting systems, ALLERT LOCK immediately sends a message on your mobile.

ALERT LOCK is battery equipped with more than 3 years of battery life. (Ask for general presentation).
